## Perspectives at UE

With globalisation, different systems of thought and values are coming together as our society becomes increasingly mobile. The consequence of this is that processes become more complex. Psychologists deal with the experience and behaviour of people in different life situations. With their expertise, they can explain and predict complex issues and decisively improve processes with their clients.

With a degree from UE, students have a wide range of possible professional fields. These include, diagnostics in the context of expert reports, human resource development, working with children and adolescents, market research and environmental psychological design, as well as diagnostic and therapeutic activities in the clinic.

## Advantages

- Study without Numerus Clausus (NC)
- Hybrid teaching for more flexibility
- Combination of theory and practical experience through the analysis of real case studies
- Integrated internship in the fifth semester
- Opportunities to establish business contacts during your studies
- Practice-oriented teaching by experts from science, business and the health sector
- Individual support in small learning groups
- Support with applications and job placements through our Career Centre
- Further career opportunities through our two consecutive psychology master's programmes.

## Why choose UE?

Globalisation is making our society increasingly mobile, different worlds of thoughts and values are coming together and processes are becoming more complex. Psychologists deal with the experience and behaviour of people in their different circumstances and can use their specialist knowledge to explain and predict complex issues and decisively improve processes with their clients.

In our Bachelor's degree programme Psychology, you will learn from renowned professors from science and industry, who have expert knowledge in areas such as clinical psychology, occupational psychology or business psychology. In addition, you can actively shape your studies and your career path through individually selectable specialisations and an interdisciplinary choice of subjects.
